TECHNICAL SKILLS

Languages: Java (Core Java, Java 17+), Python, SQL, C

Core Java: OOP (Encapsulation, Inheritance, Polymorphism, Abstraction), Collections Framework, Multithreading & Concurrency, Exception Handling, JDBC, Generics, Design Patterns

Frameworks & DBs: Spring Boot 3.x, Spring MVC, Spring Data JPA, Hibernate ORM, JUnit 5, REST APIs, PostgreSQL, MySQL

Cloud & DevOps: Microsoft Azure (App Service, Blob Storage, ACR), Docker, GitHub Actions (CI/CD), Maven, Linux, Git

Architecture & DSA: Concurrency Control, Pessimistic Locking, RESTful API Design, Data Structures & Algorithms (DSA), Command Pattern, Custom Exception Propagation

PROJECTS

NexStore — E-Commerce | Java, Spring Boot, Spring Data JPA, PostgreSQL, Azure, Docker **2026**

- Live: nexstore.azurewebsites.net
- Engineered a containerized Java e-commerce backend using Spring Boot 3.x and Hibernate ORM, and neutralized multi-threaded race conditions via database-level Pessimistic Write Locking, guaranteeing strict transactional integrity across simultaneous inventory updates.
- Automated a full CI/CD pipeline using GitHub Actions and Maven to deploy immutable Docker images to Azure Container Registry, enabling zero-downtime hot restarts on Azure App Service.

Enterprise ATM Simulator | Java 17, PostgreSQL, JDBC, Maven, JUnit 5, OOP **2026**

- github.com/RohanBisht33/atm-simulator
- Architected a highly decoupled, Object-Oriented banking state simulator with PostgreSQL relational persistence via JDBC, using a Command Pattern dispatch architecture backed by an O(1) dynamic registry for open-closed extensibility.
- Implemented explicit Custom Exception Propagation across all transactional boundaries and enforced code stability through automated JUnit 5 test suites targeting edge cases in concurrent transaction flows.

CERTIFICATIONS

- Project Development Using Java for Beginners — Udemy, Instructor: Hemanth Kumar Gurralla (45.5 hours, July 2025)
- Java for Beginners — Learn all the Basics of Java — Udemy, Instructor: Yassin Marco, MBA (5.5 hours, July 2026)
- Code Clash — Google Developer Group, MGMCOET — 1st Place (2026), 3rd Place (2024)

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University 2024 – 2028

B.Tech — Computer Science & Engineering **CGPA: 7.8**

Modern School 2022 – 2024

Senior Secondary (Class XII)

EXTRACURRICULAR ACTIVITIES

GDG Technical Team Member Aug 2025 – Present

Google Developer Groups (GDG), MGMCOET

- Collaborated on community engineering initiatives covering Java backend design patterns and co-organized technical development workshops to drive student participation.
- Competed in hackathons and programming contests organized by Google Developer Group, applying algorithmic problem-solving with cross-functional teams.
- Consistently practice Data Structures and Algorithms (DSA) in Java on competitive programming platforms, reinforcing interview-readiness for SDE/SWE roles.
